CipheX 2026 Growth & Expansion RFP

CipheX has formally published its Services RFP as part of the next phase of organizational growth and market expansion. This initiative reflects a deliberate step toward strengthening our marketing and strategic execution capabilities across both traditional and digital asset markets. We are inviting experienced professionals to submit proposals to support priority initiatives, including CPX token listing preparation, financing strategy development, and operational and technical development scaling.

As activity increases across these areas in the next few months and throughout 2026, CipheX expects to assemble a disciplined, high-caliber team prepared to execute the next phase of its evolution with precision, regulatory awareness, and institutional-grade standards. The Services RFP is scheduled to close on or before February 27, 2026, with selected RFP respondents announced shortly thereafter. Full details, including submission requirements and timelines, are available in the CipheX Services RFP document, accessible for download on the CipheX website.

CipheX Alpha Advances to Next Phase

CipheX Alpha continues to make steady, measurable progress through Phase III of its optimization cycle. An updated development roadmap for the Abacus I AMS and EMS architecture has been published on the CipheX website, providing additional transparency into the system's advancement. Live market trading and structured optimization activities began in early May, followed by the launch of the public view-only interface in early December 2025 and the successful completion of Phase II of the backend optimization development. The FYE 2025 Phase II Optimization Report is available on the CipheX website.

System refinement and performance calibration remain active priorities as development advances toward the initial commercial release. Interim or quarterly optimization updates may be issued as meaningful testing milestones are reached, reflecting continued momentum toward commercialization.

Important Notice to Reader

Certain statements contained in this communication may constitute "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 and applicable international securities laws. These statements involve risks, uncertainties, and assumptions, and are not guarantees of future performance. Forward-looking statements may include terms such as "expects," "plans," "projects," "intends," "believes," "anticipates," "targets," "continues," or similar terminology, as well as any discussions of future operations, developments, regulatory outcomes, market growth, or financial performance. All forward-looking statements reflect current views and expectations of CipheX Capital Ecosystem ("CipheX") at the time of publication and are based on information available as of that date. These statements involve numerous assumptions, known and unknown risks, and other factors that could cause actual results, performance, or achievements to differ materially from those expressed or implied in any forward-looking statement. CipheX undertakes no obligation to update, revise, or correct any forward-looking statement, whether as a result of new information, future events, or otherwise, except as required by applicable law. Readers are cautioned not to place undue reliance on these statements. This communication does not constitute an offer to sell, or a solicitation of an offer to buy, any securities, tokens, or financial instruments. CipheX is not a registered broker-dealer, investment adviser, or custodian, and does not provide investment, legal, accounting, or tax advice. All information provided herein is for information purposes only and should not be relied upon for making financial decisions. Recipients are encouraged to consult independent financial, legal, and tax advisors before engaging in any investment or digital asset activities.

CipheX Capital Ecosystem

CipheX operates on the Ethereum blockchain and provides an additional path for economic participation through ownership of CipheX Tokens. These tokens provide exposure to the broader economic activity of CipheX, including outcomes generated by CipheX Alpha and participation in tokenization initiatives. CipheX delivers a cost-efficient alternative for capitalizing on and tokenizing real-world assets and mid-stage venture projects within a rapidly expanding digital asset infrastructure economy. Global assets under management are projected to exceed USD 200 trillion by 2030, underscoring the scale at which tokenized structures may operate alongside traditional systems, according to the PwC Asset and Wealth Management Outlook. Concurrently, the global online trading platform market is estimated at approximately USD 10 to 12 billion and projected to reach USD 16 to 18 billion by 2030 to 2032, reflecting a 6 to 8 per cent CAGR. Within this landscape, CipheX Alpha is designed as a noncustodial, automation-driven solution that supports more efficient and confident self-directed portfolio management.

CipheX Alpha Network

The CipheX Alpha Network ("CipheX Alpha") is an autonomous asset management system currently operating in a precommercial testing and optimization phase and is not available to the public. Information displayed in the CipheX Alpha section of the CipheX website is provided solely for informational purposes. All capital deployed during this phase is internally funded for testing and system evaluation only. No customer, investor, or third-party capital is permitted to participate at any stage of this precommercial phase. This information should not be relied upon or used as the basis for any investment, financial, or strategic decision, nor acted upon for any purpose. It does not constitute, and should not be construed as, investment advice, a recommendation, or an offer or solicitation to buy or sell any securities, digital assets, or financial instruments. Live market activities conducted during testing are subject to technical limitations, system modifications, data variability, and external market conditions inherent to an active development environment. No representation or warranty is made regarding the accuracy, completeness, or timeliness of the information provided, which may be incomplete, outdated, or subject to change without notice. CipheX assumes no obligation to update, revise, or correct information during the precommercial phase. Any future availability of the CipheX Alpha Network for commercial or external use will be subject to applicable securities laws and regulatory requirements. Access may be restricted or prohibited in certain jurisdictions. **Past performance is not indicative of future results.**
