

ECOSYSTEM UPDATE

Published July 22, 2025

New Crypto Regulations

The introduction of new crypto regulations presents significant benefits for CipheX, the Alpha CPX Network, and its planned expansion into real-world services. Clearer regulatory frameworks will allow CipheX to reinforce institutional credibility and attract higher-tier participants as it advances its transformation toward regulatory compliance, institutional-grade governance, and enhanced financial transparency across its Ecosystem. These developments will ultimately enhance trust and accessibility for Alpha CPX's AI-driven portfolio management systems among everyday consumers and future institutional investors, laying a solid foundation for the secure integration of tokenized real-world assets and broader market participation.

CipheX Token Lockups and Monthly Vesting

The completion of certain CPX Token lockups is just days away. This week, the earned portion of unrestricted CPX Tokens, derived from each token holder's principal balance of restricted CPX Tokens, will become claimable. Once claimed, these tokens can be transferred directly to personal digital wallets. After the lockup period ends, the principal balance of restricted CPX Tokens will automatically transition into its twelve-month vesting schedule. Under this vesting schedule, token holders may claim an equal portion of their principal CPX Tokens at the end of each month and transfer those tokens to their wallets. Once claimed, these CPX Tokens will become unrestricted and tradable upon CipheX's planned listing on the Uniswap decentralized exchange (DEX).

CipheX Token Claiming and Presale

The CipheX Token Claiming Dashboard is scheduled to open on or before July 31, 2025. Once live, token holders will be able to connect their wallets to claim both their earned CPX Tokens from completed lockups and their ongoing monthly vesting allocations. The current CipheX limited presale section will transition into the dedicated access point for the Token Claiming Dashboard. Upon this transition, the limited presale will officially close and no longer be accessible to the general public. CipheX may continue certain financing activities after the limited presale. However, any future financing activities will be restricted to accredited and qualified investors, following applicable securities regulations. Additional information can be found on the limited presale section of the CipheX website.

Active Trading of CipheX Tokens

Currently, CipheX Tokens (CPX) are not listed for trading on any decentralized exchange, and no active market exists for these tokens. Any unrestricted CPX Tokens claimed through lockup completion or monthly vesting will remain untradable until CipheX finalizes its planned listing on the Uniswap decentralized exchange (DEX). CipheX is currently targeting its initial DEX listing for September 2025. This timeline is provisional and subject to change.

The actual listing date will depend on the successful completion of key development milestones, internal readiness assessments, and adherence to applicable regulatory compliance frameworks. There can be no assurance that these conditions will be met within the projected timeframe.

About The CipheX Ecosystem

CipheX is a decentralized ecosystem providing access to the Alpha CPX Network (Alpha CPX), a fully autonomous AI portfolio management platform delivering institutional-grade performance to everyday consumers. Designed to operate without intermediaries, Alpha CPX gives users full control of their digital assets while enabling advanced market execution, strategy automation, and portfolio performance optimization.
